

Hula Hooping

Length: 30min; 45min; 1hr

Delivery modes: Onsite Sessions; Team Offsite; Conference Breakout Session.

Details: A one-hour hula hooping workshop that boosts physical, mental, and social wellbeing. This fun fitness session is a great way to break up sedentary behavior at work. It's also a good exercise for team bonding experiences.

Hula Hooping can be used as an enjoyable musculoskeletal /physical and mental health strategy. Benefits include:

- **Physical Health** - providing a full-body workout. Regular hooping sessions can help strengthen stomach muscles and keep the waistline trim. The practice of hooping is said to work on a collection of core muscles that improve balance, coordination, and stamina; as well as working on the muscles that surround the lower spine - helping with back health. Depending on difficulty levels, hooping can also help improve upper and lower limb coordination.
- **Psychological Health** - It can be a mood booster, by providing stress relief and enhancing social connections.
- **Increased Cognitive Performance** - Its aerobic fitness element increases the circulation of fresh oxygenated blood to the brain. Studies show that physical exercise increases brain volume in areas linked to reasoning and executive function.
